Client Update 14

## Water Supply Interruptions

---

Exodus & Company would like to apologise for the interruptions in the water supply to the residents. Our staff is working diligently to restore service as quickly as possible.

With regards to the additional boreholes, the recent tests that were conducted by SAZ on two additional boreholes are indicating that the water is turbid, has too much iron, high pH and undesirable levels of bacteria in one of the boreholes. The developer is in the process of flushing out the boreholes and re-testing the water as part of a plan to increase the supply of water suitable for full domestic use. Tests are also pending for the 5<sup>th</sup> borehole. Unfortunately, the tests for water by SAZ take a minimum of 7 days.

We have also made plans to drill 5 more boreholes to increase them to 10. We believe a total of 10 boreholes will solve the water problem for the foreseeable future.

In the interim we would like to urge Mabvazuva residents to use water sparingly and avoid watering their gardens and lawns with hosepipes.

..... **END** .....
