Client Update 8

Notice of Load Restrictions on Roads in Mabvazuva

The structural damage caused to road foundations by heavily loaded vehicles in residential based roads is immense. Highways and major roads are constructed to a higher resistance and durability specification than roads in residential areas. Our aim is to protect the road network in Mabvazuva to remain intact and good to use for many years to come. This is the reason for imploring you to observe load restrictions in the residential areas.

In light of the above, we would like to remind our clients of the following road access restrictions;

- (1) **Big Entrance Road out of Mutare Highway:** Maximum load weight allowed is 25 tonnes.
- (2) **All other Internal Roads:** Maximum load weight allowed is 5 tonnes.

Vehicles with loads exceeding the stipulated maximum loads weight shall be refused access into the roads in Mabvazuva.

We encourage our customers in Mabvazuva to ensure that the vehicles they use to deliver their building material such as bricks, river sand, pit sand and cement are kept within these load restrictions regulations. Customers are implored to proactively cause other residents to comply with these restrictions.

The Exodus & Company Team would like to thank you for your corporation and patience.
